Center for Advanced Studies in Mathematics and Natural Science (CASMNS) Contract

The purpose of the CASMNS Program is to:

- promote academic excellence in a specific area of Mathematics or Natural Sciences
- support scholarly activities for majors in Mathematics and Natural Sciences
- encourage students to become participants in research activities
- provide opportunities for students to effectively utilize scientific resources

This CASMNS contract requires the student to be enrolled in a CASMNS course taught by a CASMNS faculty member and satisfactorily complete the following:

1. Participate in an undergraduate research project approved by the CASMNS Course Professor as well as a CASMNS Research Professor, and a Supporting CASMNS Professor (copy of contract and brief project description must be on file with the CASMNS Director)

   The project may include:

   - developing a proposal of an original research project
   - implementing an approved research project
   - participating in ongoing research being conducted by CASMNS faculty

2. Present oral presentation of research project
3. Turn in a written report and an abstract of the research project
4. Contribute to the class in a way that reflects critical thinking
5. Attend CASMNS and Honors seminars, forums, and events
6. Complete the course with a minimum grade of "B"
